

10 YEARS OF TRUST IN EVERY DROP

CSR IMPACT STORY

**Serving people.
Serving Rajasthan.**

Cold · Potable · Accessible
Drinking Water

A community-focused drinking water initiative at SMS Medical College • Zenana Hospital, Jaipur

A moment of pride: seeing the water vending unit serving people continuously in the Rajasthan heat. What began as an installation became a visible expression of access, dignity and practical CSR impact.

“The pleasure was to see the units functional every minute that we stood there, quenching people's thirst in the heat.”

From installation to impact

Happy memories as **Swachhjal Ghar** begins serving cold, potable drinking water at **SMS Medical College, Zenana Hospital, Jaipur** under CSR.

THE NEED

Accessible drinking water matters most in places where people spend long hours—especially hospitals and other high-footfall public spaces.

THE RESPONSE

A dedicated water vending unit designed to make potable, cold drinking water readily available to people when they need it.

THE EXPERIENCE

A simple service, visibly working minute after minute, turning infrastructure into an everyday community benefit.

THE COMMITMENT

Building practical solutions in India, through an MSME-led, women-led enterprise focused on service and nation building.

A visible partnership between community need, CSR support and local enterprise.

People make the impact possible

The most meaningful part of this journey is not only the machine—it is the people around it: those who supported the initiative, those who use it, and those who help make the service possible.

With gratitude

A heartfelt thank you to **Dr. Varsha** and **Dr. Nupur** for their support in making this initiative happen.

CSR

Turning responsible investment into a service people can experience every day.

MSME

A locally driven enterprise creating practical infrastructure with purpose.

WOMEN-LED

Enterprise with a focus on meaningful community outcomes.

“Sophians are family for life.”

Grateful as we begin services in Rajasthan. ■

Water that serves. Enterprise that cares.

For us, this is more than a water vending unit.

It is about making **safe, cold and accessible drinking water** available where it is needed most—and creating meaningful impact through responsible enterprise.

OUR PURPOSE

Build practical, scalable drinking-water solutions that can strengthen public spaces and communities—while demonstrating how Indian MSMEs can combine enterprise, innovation and social impact.

NATION BUILDING	MADE IN INDIA	SERVE IN INDIA
Community-first infrastructure	Local enterprise & capability	Impact where it matters

SWACHHJAL GHAR

Clean water. Practical solutions. Meaningful impact.
